

Traffic Management

The pipeline at Kurnell

Truck drivers associated with Sydney's desalination project must:

- stick to the speed limit and watch out for pedestrians and other road users
- follow the dedicated truck route (see below)
- only deliver in specified hours

Trucks for the Silver Beach construction area can only use Captain Cook Drive and Prince Charles Parade. Trucks can only use Bridges Street and Dampier Street if they are delivering to the construction area near the corner of Tasman and Dampier Streets.

All drivers must undertake a site-specific induction. This includes what will be expected of them while operating in the local Kurnell community. Two lanes of Captain Cook Drive will always remain open. Access for emergency vehicles will not be affected.

The Construction Traffic Management Plan describes how we will manage and control traffic impacts from pipeline construction activities in the Kurnell area. Please contact **1800 685 833** or **desalination@sydneywater.com.au** with enquiries.
